

Milestone 1

Immigrant Resource Portal Wireframe

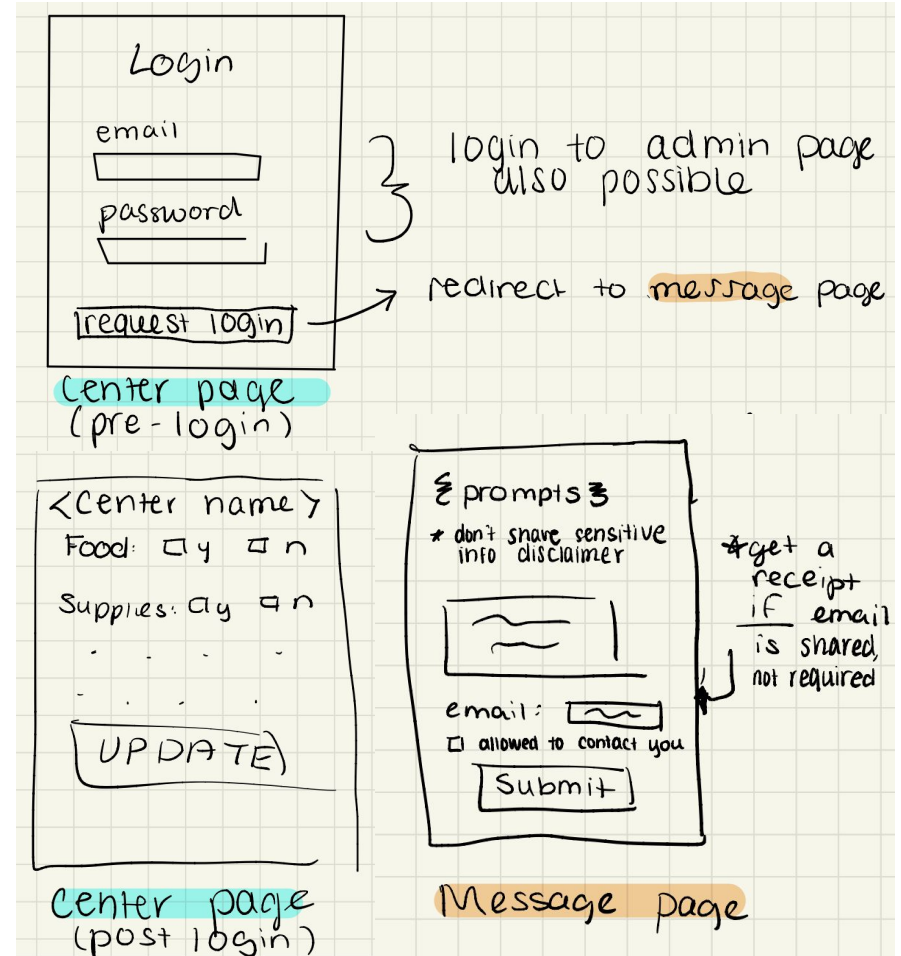

Home Page

- **Primary User:** New Migrants Migrants; Homepage designed with their usability in mind
 - Simple
 - Secure
- **Secondary User:** Service Provider/Service Center
 - Login to update services
 - Login more hidden - users will be trained how to use

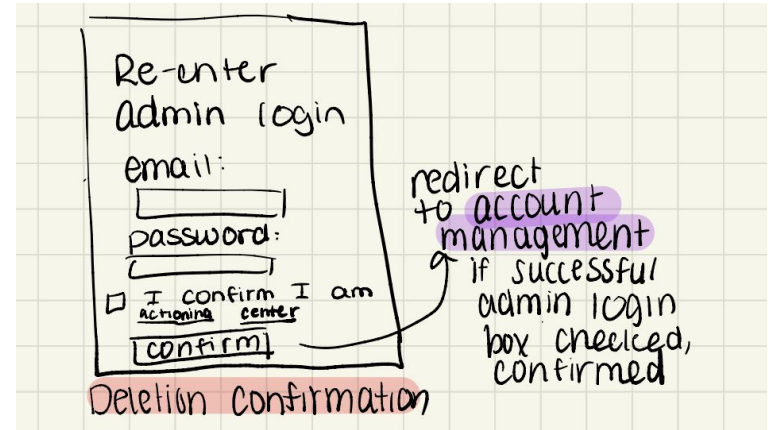

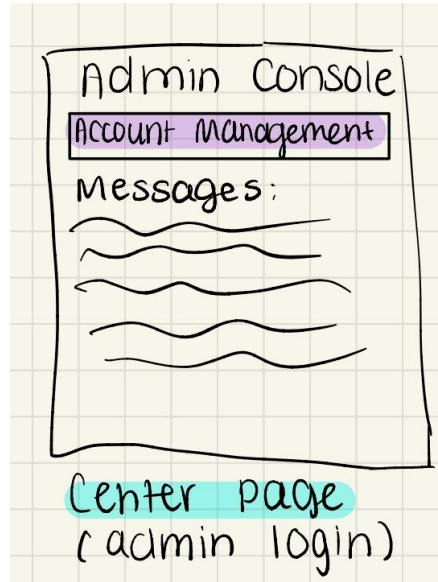

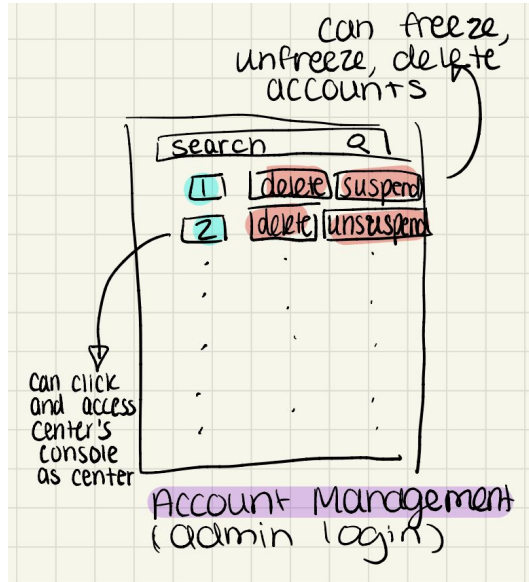

Center Page/Messages

- Center View intended to be as simple as possible:
 - Login, toggle on and off, update
- Challenge:** Lack of up to date info for new migrants on available resources; support services overworked
- Goal:** Centers able to quickly update status of services in under 30 seconds; don't send people to service providers that are at capacity; good for centers and migrants

Questions to narrow down need

Deliver necessary info

# Organization Info

- This page gives people more information into the organization such as work hours, supplies available, and services available.
- One issue that we heard from an organization is that they had difficulty updating newly arrived people as to whether they had services available, if there was a waitlist, or if they ran out of supplies.
- We want people to be informed about the status of supplies and services prior to making the trip to the organization.

Message [Organization Name]

When person hovers over navigation icon, they will see "location map" and can use apple or google maps to go to organization.

# Events

- This page allows the users to find out about several events that may be of interest (health related, etc).
- Hopefully, this platform will serve as a centralized source of information of these events for migrants. That way, migrants can rely of the platform instead of word of mouth.

## Upcoming Events
